

Ultrasound Structured Reporting and Image Management

ACCELERATE WORKFLOWS. DRIVE PRODUCTIVITY. ENHANCE CARE.

Empower your team with elite solutions that create confidence in your technology:

- Leverage dynamic and intuitive features while reducing errors and liability
- Generate customized, comprehensive reports while increasing referrals and patient volume
- Improve collaboration and communication while improving employee satisfaction and retention

Manage ultrasound studies in one seamless application for reports and images, built in a centralized cloud environment.

Comprehensive Reporting

- Detailed documentation capabilities made simple
- Faster report completion and quicker information access with smart buttons
- Unique micro-dictionaries and built-in templates for customization and standardization

Streamlined Viewing

- Easy-to-read, structured format links directly to ultrasound images
- Unique interface removes endless toggling and multiple windows
- DICOM image management

Powerful Data Tools

- Intelligent data mining and statistical analysis
- Comprehensive library of custom reports
- Easy data entry and review

Superior Customer Support

- Fast, reliable day-to-day support delivered on-demand
- Technical engineers minimize system maintenance with timely assistance
- Project managers conveniently coordinate detailed project plans

Seamless Integrations

- Complex, vendor-neutral interfaces built with ease across modalities
- Effortless, compliant secure communication between HIS, RIS, PACS, EHR and EMR
