

Upgrade your Ultrasound Reporting Software and Save

4 Ways Cloud-Based Workflow Automation Unlocks Untapped Ultrasound Revenue

#1 Save on Staffing & Work-Related Injuries

Easing physical strain by reducing repeated tasks helps prevent WRMSDs

- 90% of sonographers experience Work-Related Musculoskeletal Disorders (WRMSDs)
- WRMSDs account for a median of 8 work absences – compared to 6 missed days for other illnesses

\$54B in workers' compensation & loss of productivity

\$33K in direct costs per employee with WRMSDs

#2 Save Time with Operational & Workflow Efficiencies

Utilizing smart reporting features like guided autofill and workflow automation help save time on every study

90%

Reduce documentation time by 90%

Sonographer Documentation Time

Based on an average of 8-11 reports per day

With Other Vendors

5-10

Average minutes spent on a report per sonographer

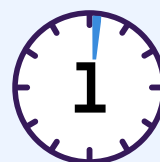

40-110

Average minutes spent reporting each day per sonographer

With AS Software

0.5-1

Average minutes spent on a report per sonographer

4-11

Average minutes spent reporting each day per sonographer

#3 Save Budget on Hardware & Related IT Expenses

Unlock new value to fund operational priorities with savings from the cloud

- Nearly 80% of respondents report experiencing cost savings from moving to the cloud

Free up to 10 hours a week spent maintaining 1 on-premise server application

Cloud deployment delivers a total annual savings of 20% to 40% of operating budget

Source: Microsoft Office 365 & Accenture

#4 Save Revenue with Fewer Missed Charges

Preventing missed ultrasound charges increases revenue without increasing the number of completed ultrasound scans

- Coding errors and manual entry can account for a loss of 10-20% of ultrasound revenue per ultrasound machine annually

Automated CPT coding and integrated billing can increase revenue per ultrasound machine by

10-20%

Based on a recent study

Unlock Your ROI Potential

Calculate your estimated savings with a cloud reporting solution and uncover untapped revenue for your ultrasound practice.
